

About the Institute

The Indian Institute of Information Technology Kottayam (IIIT Kottayam) was established in the year 2015 as one among the IIITs established under the administrative control of the Government of India and later declared as an “Institution of National Importance” by an Act of Parliament enacted in 2017. Under graduate and post graduate programmes in Computer Science and Engineering, Electronics and Communication Engineering, Cyber Security, and AI & DS are available at the institute. The institute is located on a picturesque lush green 53-acre campus in Pala, Kottayam, Kerala.

About the Dept. of Cyber Security

The Department of Computer Science and Engineering offers a specialization in Cyber Security for undergraduate students and postgraduate working professionals. The program covers a wide range of topics, including cryptography, network security, ethical hacking, and digital forensics. Students learn about the latest tools and techniques used in the field of cyber security and gain hands-on experience through practical assignments and projects. The department also offers various certification courses, training programs and consultancy. The department has dedicated cyber security and digital forensics lab equipped with advanced software and hardware to provide students an enhanced hands on experience.

About the FDP cum Workshop

The training focuses on providing a hands-on approach to various digital forensic domains and tools used in modern crime investigations. The sessions will be delivered by experts from IIIT Kottayam, Alibi Global (Company focused in Cyber Forensics & Defense Solutions) and Magnet Axion Authorized Personnel. The participants will get an opportunity to work on licensed version of forensic softwares and exposure to hardware components used in digital forensics investigation process. All sessions would be practical and demonstration oriented.

Who can attend

This workshop cum FDP is open to all faculty members, working professionals, research scholars and students who would be interested in exploring the digital forensics domain in cybersecurity.

Topics Covered

- ❖ Introduction to Digital Forensic Investigation
- ❖ Forensic Imaging using FTK Imager
- ❖ Memory Forensics using Volatility Framework
- ❖ Disk Forensics using Autopsy
- ❖ Digital Forensic Investigation using Magnet Axiom Software
- ❖ Forensic Triage using Magnet Outrider
- ❖ Multimedia Forensics
- ❖ Malware Forensics
- ❖ Network Forensics
- ❖ Log Analysis using Splunk
- ❖ Demonstration of Forensic Imaging and Write blocker kits, FRED Forensic Workstation

Registration

₹ 1500 /-

Registration fee includes working lunch and refreshments

Accommodation

Shared Accommodation will be provided on payment basis

Registration and Payment link
