

ABOUT THE WORKSHOP

The 10-days workshop offers a hands-on experience in ethical hacking and digital forensics. The training sessions will be offered by experts from IIIT Kottayam. Sessions on ethical hacking will cover critical topics such as passive and active reconnaissance, vulnerability analysis, web application penetration testing, and practical demonstrations of real-world attacks, helping participants build offensive security skills. The digital forensics training will provide exposure to modern investigation tools. Participants will get the opportunity to work with licensed forensic software and interact with hardware components commonly used in investigation processes. All sessions will be highly practical and demonstration-driven, ensuring real-world insights into both ethical hacking and forensic analysis.

ABOUT THE INSTITUTE

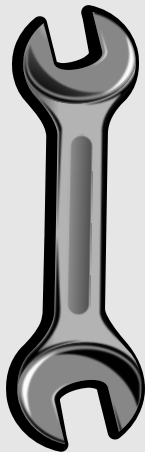

The Indian Institute of Information Technology Kottayam (IIIT Kottayam) was established in the year 2015 as one among the IIITs established under the administrative control of the Government of India and later declared as an "Institution of National Importance" by an Act of Parliament enacted in 2017. Under graduate and post graduate programmes in Computer Science and Engineering, Electronics and Communication Engineering, Cyber Security, and AI & DS are available at the institute.

ABOUT THE DEPARTMENT OF CYBER SECURITY

The Department of Computer Science and Engineering offers a specialization in Cyber Security for undergraduate students, postgraduate working professionals and PhD research scholars. The program covers a wide range of topics, including cryptography, network security, ethical hacking, and digital forensics. The department also offers various certification courses, training programs and consultancy through its Cyber Labs initiative. Cyber Labs, Kottayam is involved in the training of Cybercommandos an initiative of MHA and I4C and has also trained five batches of Kerala police. The Digital Forensics and Offensive Security Lab (Sherlock) is equipped with advanced software and hardware to provide students an enhanced hands on experience in Digital Forensics and Penetration testing.
