Objectives of Workshop

- To introduce the fundamental concepts of statistics, machine learning, and optimization.
- To help participants understand how to analyze, interpret, and gain insights from data.
- To explain how models are developed and applied for tasks such as prediction, classification, and clustering.
- To provide a clear understanding of optimization techniques commonly used in data science.

About the Workshop

This Faculty Development Program (FDP) aims to provide a strong foundation in the essential concepts of Statistics, Machine Learning (ML), and Optimization. Designed for faculty, researchers, and postgraduate students, the workshop will cover the mathematical underpinnings, practical tools, and applications that are crucial for modern data-driven research.
