Beyond 5G & 6G

22. 07.2020, 10AM ~ 11AM

**Speaker: Dr. Sukhdeep Singh, Chief Engineer, Network
R&D; Samsung Research Institute, Bangalore**

Why this webinar: It is expected that the completion of the 6G standard and its earliest commercialization date could be as early as 2028, while mass commercialization may occur around 2030. Both humans and machines will be the main users of 6G, and 6G will be characterized by provision of advanced services such as truly immersive extended reality (XR), high-fidelity mobile hologram and digital replica. While 5G commercialization is still in its initial stage, it's never too early to start preparing for 6G because it typically takes around 10 years from the start of research to commercialization of a new generation of communications technology.

In this webinar, Dr. Singh will introduce goals, key drivers and research challenges of 6G, and the opportunity for the academic community to contribute towards 6th Generation network development.

About the Speaker

Dr. Sukhdeep Singh is working with Core System Design R&D team of Samsung R&D India Bangalore (SRIB) since 2016. He has designed 22 core network features at Samsung Electronics, South Korea for Global operators. His pioneer works also includes Cloud System Design leading ONAP activities. Currently he is responsible for design and R&D of O-RAN and Networks Slicing for 5G Networks.

Dr. Singh published 14 research papers, 3 patents and two book chapters after joining Samsung R&D. He has received Samsung Best Paper Award, as well as Employ of the quarter thrice from SRI-B. Dr. Singh completed his Ph. D. from Sungkyunkwan University, South Korea with the honor of receiving "SKKU bright student scholarship award" followed by "Superior Research Award". During his Ph.D., he had the opportunity to do research work with Vice President and Director of Network Business Division at Samsung Electronics in South Korea. He was also part of Brain Korea (BK21) and National Research Foundation of Korea projects. While working on diverse advanced frontier like eMBMS scheduling, video delivery architecture for 5G, integrating sociology with Next Generation Mobile Networks, D2D communications.

Dr. Singh has served as Guest editor in Taylor and Francis IETE journal, General Chair in IEEE WCNC 2020 and IEEE Globecom 2020. He also served as Technical Program Chair member for IEEE iNIS 2016, IEEE iNIS 2017, and ISRO-ACM ICSE 2017. He has also been invited as a guest lecturer by University of Toronto, IIT Roorkee, IIT Ropar, IIT Hyderabad and IIT Bombay and keynote speaker at Springers ICIMMI 2019.

He is editing world's first book on 6G.
