

ABOUT THE WORKSHOP

This workshop focuses on advanced cryptography and digital forensics concepts with introduction of relevant tools and hand-on sessions. The topics covered in this session will include encryption methods, blockchain technology, and digital forensics. Our skilled resource persons will walk you through the complexities of these topics, giving you a thorough overview of the most recent advances in the world of cybersecurity.

Who can attend

This workshop is open to working professionals, faculty members, research scholars in CSE/IT/ECE/Cyber Security or related fields, PG students (MCA or M.Sc. Computer Science/IT, M.Tech. / M.E. in CSE/IT/ECE/Cyber Security or related fields), and UG students (B.Tech in CSE/IT/ECE/Cyber Security or related fields) from all Institutes, Colleges, and Universities.

REGISTRATION

Registration Fee :

1500/- (For all external participants)

Last date: 02 June 2023

ABOUT THE INSTITUTE

The Indian Institute of Information Technology Kottayam (IIITK) is a prestigious higher education institution in Kottayam, Kerala, India. IIITK, founded in 2015, is one of 20 IIITs established by the Government of India's Ministry of Human Resource Development. Under graduate and post graduate programmes in Computer Science and Engineering, Electronics and Communication Engineering, Cyber Security, and AI & DS are available at the institute. IIITK features a cutting-edge campus with modern amenities.

ABOUT DEPT. OF CYBER SECURITY

The Department of Computer Science and Engineering offers a specialization in Cyber Security for undergraduate students and postgraduate working professionals. The program covers a wide range of topics, including cryptography, network security, ethical hacking, and digital forensics. Students learn about the latest tools and techniques used in the field of cyber security and gain hands-on experience through practical assignments and projects. The department also has a dedicated cyber security lab equipped with advanced software and hardware to provide students with a realistic simulation of cyber threats and attacks.

CONTENTS OF THE WORKSHOP

This workshop aims to highlight current trends and developments in Cyber Security and Cryptography. The workshop will concentrate on theoretical topics as well as give participants with hands-on experience.

The following topics will be covered:

- **Cyber Law**
- **Mathematical Models for Security**
- **Lattice-based Cryptography**
- **Web application security**
- **Quantum Cryptography**
- **Hardware Security**
- **Blockchain Technologies**
- **5G/Network Security**
- **ML & Security**
- **Digital Forensics**
- **Malware Analysis and Penetration Testing**
